# Deirdre Massaro

Front End Engineer

## 💼 Employment History

### Design Engineer at Retool, Remote

September 2023 — Present

- Lead front-end development efforts for Retool's web presence utilizing React, TypeScript, Tailwind CSS, and Framer Motion.
- Partnered with the design team to implement and create beautiful, groundbreaking web experiences including the redesign of Retool's blog.
- Helped establish and maintain a design system for Retool's web presence.

### Front End Engineer II at Productiv, Remote

August 2022 — September 2023

- Contributed to all aspects of product development, from prototyping to architecting and implementing application UX.
- Developed user interface components and monitored live site with React.js, leveraging TypeScript for type safety and code maintainability.

### Front End Engineer II at Postscript, Remote

July 2020 — August 2022

- Led advancement of internal front-end codebase by being the second designated front end engineer at the company.
- Utilized modern usage of React (hooks, context API, functional components etc) to optimize application.
- Built out features and developed interfaces from designs with modern JavaScript libraries (Next.JS, Node.JS, React/Redux, etc.).

### Software Engineer at Leafly, Seattle, WA

May 2017 — July 2020

- Worked with engineering team to support and evolve Leafly.com with server side, API, and client side development.
- Assisted with development of the first legal cannabis pickup web application using React, CSS, HTML, JavaScript, Webpack, Node.js, and JSON.

## 🎓 Education
